Scope of Work

CONTRACTOR’s fish passage biologists and scientific technicians will provide PARKS with the following services:

- 1 Statewide road-based inventory and assessment of PARKS fish passage barriers using an inventory crew;
- 2 Maintain a statewide barrier database and update as needed as new barriers are discovered and existing barriers are corrected;
- 3 Conduct inventories of fish passage barriers within identified safety and mobility projects,
- 4 Evaluate fish use prior to and after fish passage project construction to assess the effectiveness of fish passage projects;
- 5 Inspect and perform minor maintenance (small debris removal) on PARKS fishways and notify the PARKS Facilities Manager of required maintenance; and
- 6 Conduct the pre-project scoping necessary for the development of the Six Year Plan as described below.

Six Year Planning Document

At the request of PARKS, CONTRACTOR will prepare a prioritized list of fish passage projects to be constructed and evaluated over the next three biennia. The Six Year Plan is the result of a process of project evaluation, scoping, development of conceptual designs, and budgeting.

Fish Passage Project Scoping Process

The first step in the scoping process involves verification of inventory and assessment data and filling in any data gaps. Next, the CONTRACTOR biologists confirm completion of inventory work and the prioritization effort for each barrier culvert and verify that habitat conditions and species expected to benefit are correctly reflected in the PI for each barrier. In addition to the PI, other factors for fish passage project selection, such as additional human-made barriers in the watershed, project feasibility, likelihood for success, and project costs are also considered. All scoping information is summarized and a map is generated to show the location of additional human-made barriers located downstream and upstream of the PARKS barrier. Once biological scoping is complete, projects that successfully meet the verification process will be recommended for the Six Year Plan. In some instances, projects are placed on hold until further evaluation work is completed.
